

12. Conectando container a rede

quarta-feira, 16 de agosto de 2023

16:26

Conectar container

- Podemos conectar um container a uma rede;
- Vamos utilizar o comando **docker network connect <rede> <container>**
- Após o comando o container estará dentro da rede!

```
PS H:\20_DOCKER\arquivos\3_networks\3_conn_containers\flask> docker network ls
```

NETWORK ID	NAME	DRIVER	SCOPE
db4bf32a8850	bridge	bridge	local
97469c387d1e	flasknetwork	bridge	local
eef139c44ac1	host	host	local
c3ae26c95cfc	none	null	local

```
PS H:\20_DOCKER\arquivos\3_networks\3_conn_containers\flask> docker network connect flasknetwork 947ac6c40e03
```
