

11.Bind mount no compose

quarta-feira, 16 de agosto de 2023 17:22

Bind mount no Compose

- O volume de **Bind Mount** garante atualização em tempo real dos arquivos do container;
- Podemos configurar nosso projeto de Compose para utilizar esta funcionalidade também;
- Vamos ver na prática!

```
13 volumes:
14     - ./mysql/schema.sql:/docker-entrypoint-initdb.d/init.sql
15
16 flask:
17     depends_on:
18     - db
19     build: ./flask/
20     ports:
```

PROBLEMS TERMINAL OUTPUT DEBUG CONSOLE 1: powershell + []

ID	Service	Command	Time	Status	Ports
3f96ea8b14c6	6_bind_mount_compose_flask	"python ./app.py"	9 seconds ago	Up 8 seconds	0.0.0.0:5000->5000
16bc7f21f6bc	6_bind_mount_compose_db	"docker-entrypoint.s..."	11 seconds ago	Up 1 second	0.0.0.0:3306->3306
